

FINANCIAL TEAR SHEET

CORPORATE PROFILE

We are a clinical-stage biopharmaceutical company developing innovative therapies for rare forms of cancer and orphan diseases.

Leveraging our proprietary ERYCAPS platform, which uses a novel technology to encapsulate therapeutic drug substances inside erythrocytes, or red blood cells, we have developed a pipeline of product candidates targeting markets with high unmet medical needs. Our initial focus is on the treatment of blood cancers, including acute lymphoblastic leukemia, or ALL, and acute myeloid leukemia, or AML, by depriving tumors of nutrients necessary for their survival, which is referred to as tumor starvation.
